

CITY OF PORT ST. LUCIE UTILITY SYSTEMS DEPARTMENT LANDSCAPE POLICY

General Requirements

This policy applies to landscaping in any Port St. Lucie Utility Systems Department (PSLUSD) utility easement or near a PSLUSD facility, either above or below ground.

All landscaping within (PSLUSD) utility easements shall comply with Chapter 154 of the City's Code of Ordinances and PSLUSD Utility Standards, Details and Policies.

No landscaping shall be planted in such a manner as to adversely affect utility installation, operation and maintenance.

All existing and proposed underground utility mains, appurtenances, and easements must be shown on the landscape plans.

Berms and structural landscape features such as rock, foundations, sculpture, decorative walls and tree wells are generally not allowed in PSLUSD easements, but may be reviewed on a case by case basis.

All measurements are from outside to outside, not centerline to centerline. Example: outside of pipe to nearest point on tree trunk.

Trees shall not be planted within 10 feet of any PSLUSD mains or appurtenances, except as allowed hereunder.

No landscaping other than sod grasses may be planted within a 5' radius maintenance area of any PSLUSD appurtenance such as water meters, backflow devices, fire hydrants, sanitary sewer cleanouts, and manholes, air release valves, etc.

Easement and Utility Area Landscaping.

In locations where the perimeter landscape buffers must be designed to be located in utility easements due to site constraints, the following list of trees, palm trees and shrubs may be used in these areas to meet the landscape buffer requirements. Listed trees and palm trees may be planted not less than 7 feet from the underground PSLUSD infrastructure. The remainder of the landscape strip shall be planted with grass, approved shrubs and ground cover.
