

Create your own water cycle

All of Earth's water is part of an endless "water cycle." Through this cycle, nature cleans and moves water from a water body to the air, then to the land and back again.

1. Fill jar with items as shown
2. Gently water the plant
3. Put the lid on
4. Place jar in a sunny place
5. Condensation will form
6. Watch the water cycle
