

CRS Activity 510

2024 Annual Progress Report on Implementation of Credited Plan

Date this Annual Progress Report was prepared: February 20, 2025
(not the credited Hazard Mitigation Plan or Repetitive Loss Area Analysis)

Name of Community: St. Lucie County

Name of Hazard Mitigation Plan: Unified Local Mitigation Strategy Plan

Date of Adoption of Plan: September 14, 2021

5 Year CRS Expiration Date: September 14, 2026

1. *How can a copy of the credited Hazard Mitigation Plan (Floodplain Management Plan) or Repetitive Loss Area Analysis be obtained:*

Online here: <http://stlucieco.gov/departments-services/a-z/public-safety/disaster-preparedness/local-mitigation-strategy>

2. *Describe how **this annual progress report** (not the credited Hazard Mitigation Plan or Repetitive Loss Area Analysis) was prepared and how it was submitted to the governing body, released to the media, and made available to the public:*

This report is prepared by the LMS or CRS Coordinators of the jurisdictions, who then submit to the LMS Working Group for approval, whose membership is comprised of community stakeholders. It is officially submitted to the governing bodies of each participating jurisdiction via their bodies' method for receiving items for their governing bodies. The Public Information Officer for each jurisdiction notifies the media in accordance with their own individual policies, as well as, posting to the approved progress report to the webpages of the jurisdiction for the consumption of both the media and the public.

3. *Provide a description of the implementation of each recommendation or action item in the action plan or area analysis report, including a statement on how the project was implemented or not implemented during the previous year:*

CRS Step 8: Action Plan

Prevention Section

1. Not due for evaluation or update until 2026, not implemented in the previous year
2. Not due for evaluation or update until 2026, not implemented in the previous year

3. Not due for evaluation or update until 2026, not implemented in the previous year

Property Protection Section

1. Not due for evaluation or update until 2025, not implemented in the previous year
2. Not due for evaluation or update until 2025, not implemented in the previous year

Natural Resource Protection Section

1. Not due for evaluation or update until 2025, not implemented in the previous year
2. Not due for evaluation or update until 2026, not implemented in the previous year

Emergency Services Activities Section

1. Each jurisdiction should consider acquiring the capabilities to allow for them to operate and function on the mass notification system within their jurisdictional boundaries to alert residents to all-hazards including flash flooding and hurricanes. (Due 12/2023)

SLC manages the mass notification system (Alert St. Lucie). Each jurisdiction has access through the SLC DEM Duty Officer to have alerts sent out within their respective jurisdiction in the event of an emergency. The primary law enforcement agency in each jurisdiction also has access to send out emergency messages through this system. The Everbridge system (which is the backbone of Alert St. Lucie) automatically sends out Flood Warning messages and other warnings issued by NOAA and their partners just as it would go out over a weather radio.

Separately, the City of Port St Lucie has recently (2022) purchased a system which will send out text messages or phone calls to the residents of this jurisdiction for a fee per use that is charged to the City. The City uses this system for announcements, boil water advisories and other information that is not necessarily appropriate for the Alert St. Lucie system, but the Office of Emergency Management of the City of PSL will use this secondary system as a redundancy in the event the primary system does not work at the time of an emergency.

2. Each jurisdiction should participate in a minimum of one (1) annual exercise of emergency communications systems to ensure communications capabilities during a flooding or any other hazard situation (Due 5/2022)

Each jurisdiction holds an annual exercise either together or separately which has a component within it for communicating between jurisdictions through their EOCs. For example, the City of Port St. Lucie's Hurricane Exercise in June of 2024 had a built-in component which tested EOC communications capabilities between jurisdictions and other partner agencies.

Public Information Activities Section

1. Each jurisdiction should consider participating in a stakeholders (STK) event annually to maximize exposure of CRS and the NFIP to the citizens of their respective jurisdictions. (Due for evaluation May/June annually). This project was implemented in the 2022 Calendar Year, although delayed until July 9 due to an approaching tropical system during the original date of June 5.

In 2024, the City of Port St. Lucie held a Stakeholders (STK) event called the 2024 Hurricane Expo at the MidFlorida Event Center from 10:00 am to 2:00 pm. Over 2,200 citizens of St. Lucie County, Fort Pierce, and Port St. Lucie attended this annual event which includes speakers from the National Weather Service – Melbourne Office, as well as meteorologists from all three local media outlets [CBS (WPEC), NBC (WPTV), ABC (WPBF)] set up booths to talk about various weather hazards including lightning, rip currents, flooding, hurricanes, etc. and all spoke in the auditorium live about their predictions for the 2024 Hurricane Season, as well as other topics like how to make a plan, build a kit, flood insurance, etc. The Expo also had 2 separate business areas where storm and flooding-specific businesses from around the City and County provided information and offered specific mitigation measures that residents could purchase for their homes. These businesses acted as partners (and some were paid sponsors) of this STK event. The City of Port St. Lucie and St. Lucie County CRS Coordinators participated in this STK event and provided information and handouts to the attendees, but the City of Fort Pierce did not participate in this STK event.

2. Each jurisdiction is encouraged to continually refine the Unified PPI by reviewing annually and making adjustments based on public response and new/updated information. (due by January of each year for the year prior).

The PPI Subcommittee met in November 2024 to evaluate/review the PPI's implementation and effectiveness for the year. The PPI annual progress report is a separate document should be referred to for more information. The PPI voted to add a new message to Topic 7 regarding tornadoes to the PPI document in 2024 at their meeting on November 7, 2024 and sent their

annual report to the LMS Working Group who approved the report at the December 2024 meeting.

3. Each jurisdiction should consider maintaining a supply of materials/handouts for use in all public outreach events, including information on hurricane/flood preparedness, NFIP, evacuation zones, and mass notification systems. (due for review by December 2022)

All jurisdictions have begun keeping a supply of these items as of 2022.

4. Each jurisdiction should provide and advertise a map information service to their respective citizens. (due for review December of 2022)
At last check, each jurisdiction does provide a map information service to its citizens. At the time of this writing, the City of Port St. Lucie had completed its OP's in 2024 which advertised this service via webpage, annual mailer to target audiences, and this service is also advertised in the "Flood Facts" brochure they give out at every outreach event. St. Lucie County also maintains and advertises this service in their flooding brochure and advertises through their OP projects. The City of Fort Pierce advertises this information through their flood brochure which is sent through the utility bill to their residents as part of their OP projects.

Structural Projects Section

1. Each coastal jurisdiction should consider developing and adding projects to the Prioritized Project List to combat against sea level rise by installing Tidal Check Valves to control water from flooding streets during "king tide" events.

These are still under evaluation as of the end of 2024, specific "king tide" projects have not been added to the PPL at this time for the two identified jurisdictions in the Step 8 Action Plan at this time. This will be re-evaluated in the next progress report for 2025.

2. Not due for evaluation or update until 2025, not implemented in the previous year

4. *Discuss why any objectives were not reached or why implementation is behind schedule.*

Implementation for all items except structural projects are on schedule at this time. The structural projects are still being evaluated for consideration to be added to a future PPL list. Due to Hurricane Milton in October of 2024, there will be HMGP funding coming to St. Lucie County to implement mitigation projects sometime in 2025.

5. *What are the recommendations for new projects or revised recommendations?*

The Project Priority List is updated with new project submittals annually, as well as projects seen as no longer viable being removed. This annual Project Priority List update with submittals allows for new and revised projects to be recommended, reviewed, and ranked by priority each year based on changes in the funding priorities and availability of funds in each participating jurisdiction. See attached PPL revised for 2024 which includes over a dozen new projects submitted by jurisdictions in 2024 for ranking.

Date: 11-16-2024

St. Lucie County Local Mitigation Strategy Project Prioritized List

Total Cost:

\$ 1,543,542,352.90

Rank	Score	PROJECT #	Applicant	Project Title	Hazard Mitigated	Jurisdictions Benefited	Completion Timeline	Potential Funding Source	Estimated Cost (\$)	Estimated Federal Share (\$)	Status	Comment
